<b>5. Risks</b>	
<b>Exchange rate (currency) – for EUR currency clause loans</b>	<p>The exchange rate is formed under the influence of a financial market's supply and demand. Since the exchange rates and variables affecting them constantly fluctuate, there is exchange rate risk present. Currency risk is the insecurity of local currency's value compared to the foreign exchange value due to exchange rate changes. The exchange rate change may actually reduce or increase the value ratio between two currencies and thus the amount of the agreed obligation. Therefore, it is possible for the contractual obligation denominated in HRK to change due to the exchange rate fluctuation.</p>
<b>Interest rate risk</b>	<p>Housing loan interest rate changes depend on:</p> <ul style="list-style-type: none"> <li>the 6M NRS1 EUR fluctuation for loan with EUR currency clause which is determined depending on the fluctuation within the Croatian banking sector.</li> </ul> <p>The national reference rate (NRS) is the average cost of resources of the Croatian banking sector (banks and savings banks) for a specific past period (of 3, 6, or 12 months), the source type (natural persons' deposits, deposits of non-financial sector legal entities, all other banks' finance sources) and the relevant currency (HRK, EUR, USD, CHF), i.e. the NRS is an average interest paid by the banking sector to obtain funds required for its lending activities and it is determined quarterly.</p> <p>The 6-month NRS is calculated on basis of the data on natural persons' EUR deposits and it is marked as 6M NRS1 for EUR. Over a specific period, the 6M NRS1 EUR may increase or decrease and therefore, and in accordance with the General terms and conditions of Privredna banka Zagreb d.d., Zagreb in providing loans to natural persons and an individual loan agreement, the interest rate will be changed as well. By agreeing a variable interest rate and by accepting the General terms and conditions of Privredna banka Zagreb d.d., Zagreb in providing loan services to natural persons, a client shall also accept the variable interest rate risk due to the change of the 6M NRS1 EUR over the course of the contractual relationship.</p> <p>The Croatian National Bank calculates and publishes the NRS on its web page (<a href="http://www.hnb.hr/nrs">www.hnb.hr/nrs</a>) on basis of the data it disposes of which were gathered for regulatory purposes (<a href="https://www.hnb.hr/statistika/statisticki-podaci/financijski-sektor/drugemonetarne-financijske-institucije/kreditne-institucije/pokazatelji-poslovanja-kreditnih-institucija">https://www.hnb.hr/statistika/statisticki-podaci/financijski-sektor/drugemonetarne-financijske-institucije/kreditne-institucije/pokazatelji-poslovanja-kreditnih-institucija</a>) in accordance with Art. 162 of the Credit Institutions Act (OG, No. 159/2013.,19/2015.,102/2015.,15/2018.,70/2019.,47/2020., 146/20), together with the NRS calculation methodology and the NRS publication calendar.</p> <p>Should NRS no longer exist, the Bank shall use an interest rate (including any spread or adjustment) which could be formally proposed by the regulator, i.e. authority as determined by the Act on Implementation of Regulation (EU) 2016/1011 on indexes used as reference values, i.e. generally accepted market practice or financial industry proposals, of which PBZ shall timely notify the client.</p>
<b>Job or partial income loss risk</b>	<p>Apart from the risk related to the exchange rate fluctuation and the interest rate change, there is the risk related to the loan repayment due to possible income or partial income loss (job loss, personal income reduction etc.).</p>
<b>Consequences of contractual obligation non-fulfillment</b>	<p>If a client failed to meet contractual obligations, either due to losing their job or for another reason, prior to the cancelling of the agreement, the Bank shall undertake collection measures of the outstanding receivables, which shall include, but shall not be limited to, sending notifications and reminders, activating agreed collaterals (promissory note etc.), which might result in a seizing/notarial procedure and sales of the property under lien etc. in the end.</p> <p>On missing, i.e. late payments the Bank shall calculate and collect legal penalty interest, which applies in accordance with the regulation. The penalty interest rate is determined for each half year, by increasing the average interest rate on the credit balances granted for a period longer than a year to non-financial companies as calculated for the reference period preceding the current half year, by three percentage points, and which on the day this General information were made amounted to 5.49% annually. The average interest rate for the reference period is published by the Croatian National Bank on each January 1 (for the period May 1 – October 31) and on July 1 (for the period November 1 – April 30) in the National Gazette.</p> <p>In case the loan agreement was cancelled and/or forced collection procedure was initiated, actual costs may occur for the loan user and they may be: the cost of initiating and managing forced collection procedure with a public notary, courts or Financial Agency (legal and public notary costs incurred during a seizure and/or litigation procedure, advances, including fees and fees calculated in accordance with tariffs, court fees), the cost of delivering legally enforceable seizures and other payments to Financial Agency, the cost of fees with the purpose of insurer status checks with HZMO (Croatian Pension Insurance Institute) and other registers, the cost of checking residence, as well as assets check with courts, legal entities and other authorities in accordance with the provisions of the Seizure Act managing records and registers, as well as any other costs incurred during liability collection, the type and amount of which are determined by regulations, depending on the type of procedure, i.e. respective court decision, possible litigation costs.</p>

<p><b>Risks related to default status of the Loan user and persons related to them</b> (the effect of default or failure to meet financial obligations of the Loan user and persons related to them (e.g. solidary debtor, User as a trade owner) in the Bank and the members of the PBZ Group on the possibility to use financial services of the Bank and the members of the PBZ Group)</p>	<p>If the Loan user was in arrears by more than 90 consecutive days in the Bank and/or members of the PBZ Group (e.g. loan arrears, Bank and/or PBZ Card's card liability arrears etc.) the default status may be gained.</p> <p>In addition to the case described above, the Loan user <u>may gain the default status</u> also if:</p> <ul style="list-style-type: none"> <li>- they are a solidary debtor in another loan arrangement where that loan's user is in arrears with their financial obligations with the Bank and/or members of the PBZ Group, and as the loan user they have been regularly settling all of their own financial obligations in the Bank and/or members of the PBZ Group.</li> <li>- if the User owns a trade which is in arrears with their financial obligations related to any service or product of the Bank and/or members of the PBZ Group.</li> </ul> <p>If the Loan user gained the default status, they will have a limited possibility of use or individual financial services in the Bank and/or members of the PBZ Group will be completely unavailable to be used for a specific period of time (e.g. limited credit card (revolving/charge) spending or credit card blocked, limited card installment repayment use at the points-of-sale, reduction or terminated of the granted overrunning amount and unavailability of being granted a loan).</p> <p>A solidary debtor in a loan where that loan's user gained the default status may be assigned the default status themselves although they have been regular in their settling of financial obligations with the Bank and/or members of the PBZ Group. In such a case the Solidary debtor, due to the arrears of the Loan user and persons related to them (trade), will be limited in their possibilities to use or individual financial services in the Bank and/or PBZ Group will be completely unavailable for use for them during a specific period of time.</p> <p>The default status may be assigned to the Solidary debtor even if the Loan user and the trade owned by the Loan user have been regular in the fulfillment of all of their financial obligations in the Bank and/or members of the PBZ Group if the Solidary debtor was in arrears regarding their financial obligations for more than consecutive 90 days in the Bank and/or members of the PBZ Group.</p> <p>A more detailed explanation is available in the Information for the clients (consumers) on the default criteria for fulfillment of financial obligations in the Bank and the members of the PZB Group as published on the web pages of the Bank <a href="http://www.pbz.hr">www.pbz.hr</a> (financial liability adjustment)</p>
